

We want to register our desire to retain the Air1 national radio service thru the local FM translator which is in danger by LPFM. Air1 provides us info on events and music that we use to attend concerts. It also provides encouragement to our family. We do not have an alternate station that provides the same level of information and entertainment. The audience for this station is large in our area and preventing their ability to transmit would cause a loss to our family and many others. Thanks for your consideration.
